

Sun King's Value Chain for Latin America Expansion

Here's the value chain structure adapted for Sun King's expansion into Latin America, following best business practices to ensure an effective market entry for their solar products in the region.

Elements	Activity Description	Strategic Objectives
Competitive Advantage	- Advanced, accessible, and efficient solar technology. - Affordable "pay-as-you-go" (PAYG) financing model.	- Penetrate off-grid markets in LATAM. - Position Sun King as a leader in off-grid solar energy.
Support Processes		
Firm Infrastructure	- Establish support offices in LATAM. - Logistics and warehousing agreements in Panama's Free Trade Zone.	- Minimize operational and logistics costs. - Enhance access to local resources and distributors.
Human Resources	- Train local agents for technical support and sales. - Hire staff in key countries for post-sale service.	- Ensure technical support and strengthen the local sales and maintenance network.
Technology Development	- Integrate local payment systems into PAYG. - Adapt products to local regulations and climate conditions.	- Boost adoption of the PAYG model. - Meet local regulatory standards and optimize product performance in regional conditions.
Procurement	- Select suppliers for specific components. - Manage inventory for critical products like lithium batteries.	- Reduce procurement costs and ensure availability of key components.
Primary Business Processes		
Inbound Logistics	- Initial product distribution from Panama's Colón Free Trade Zone. - Coordinate with local transportation agents.	- Optimize transportation costs and reduce delivery times.
Operations	- Strategic warehousing for rapid distribution. - Preparation of product demonstrations and PAYG test systems.	- Increase accessibility to Sun King products in off-grid areas. - Build confidence in the PAYG financing model.
Outbound Logistics	- Direct delivery to distributors and institutional partners in each country.	- Expand the local distributor network and ensure product availability.

	- Develop retail distribution channels.	
Marketing and Sales	- Participate in energy fairs and events in LATAM. - Educational campaigns to promote solar energy use.	- Increase brand visibility and product acceptance in the market.
After-Sales Service	- Establish service centers in key countries. - Provide spare parts and remote technical support through PAYG.	- Improve customer satisfaction and lower adoption barriers.

Key Points

- ****Financing and Payments****: Implementing local payment systems for the PAYG model is essential for ensuring accessibility.
- ****Distributors and Partners****: Partnerships will be established with local distributors and financing institutions to reach rural areas.
- ****Regulatory Compliance****: Ensure compliance with import and safety regulations for products containing lithium batteries.
