Creating Connected Customer Relationships: Overview

Professor Nicolaj Siggelkow, PhD

Creating Connected Customer Relationships

- 3 steps
 1. Map the current customer journey of one customer experience
 2. Identify customer willingness-to-pay drivers and pain points
 3. Capture the information flow for this customer experience
 4. Identify the deeper needs of the customer
 5. Understand the relationship with your customer across separate (repeated) customer experiences

Creating Connected Customer Relationships

- 3 steps
 6. Identify new opportunities to reduce customer pain points and to lower fulfillment costs
 7. Find ways to utilize information gathered from repeated interactions to improve the Recognize-Request-Respond cycle
 8. Assess your data-protection policies to maintain trust with your customer

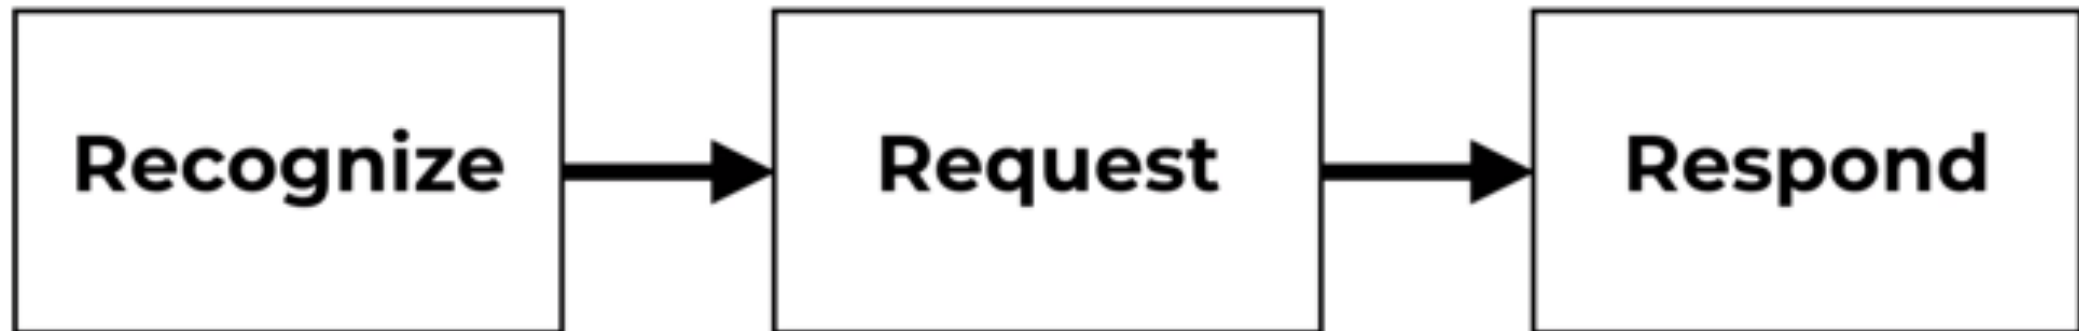

ONLINE

Connected Strategy Capstone

Step 1: Mapping the Current Customer Journey

Professor Nicolaj Siggelkow, PhD

Customer Journey

Customer Journey – Step 1

Worksheet 1. Map the current customer journey of one customer experience

Customer Journey							
Why does the customer engage in the interaction?		How does the customer go about identifying, ordering and paying for the desired option?			What products and services are provided to the customer?		
Latent need	Awareness of need	Search for options	Decide on options	Order & pay	Receive	Experience good / service	Post-purchase experience

Customer Journey – Step 1

Worksheet 1. **Map the current customer journey of one customer experience**

Customer Journey							
Why does the customer engage in the interaction?		How does the customer go about identifying, ordering and paying for the desired option?			What products and services are provided to the customer?		
Latent need	Awareness of need	Search for options	Decide on options	Order & pay	Receive	Experience good / service	Post-purchase experience

What are the underlying needs that the customer wants to fulfill?

© 2019 Nicolaj Siggelkow & Christian Tenfelde

Customer Journey – Step 1

Worksheet 1. **Map the current customer journey of one customer experience**

Customer Journey							
Why does the customer engage in the interaction?		How does the customer go about identifying, ordering and paying for the desired option?			What products and services are provided to the customer?		
Latent need	Awareness of need	Search for options	Decide on options	Order & pay	Receive	Experience good / service	Post-purchase experience

When and how does the customer become aware of this need?

© 2019 Nicolaj Siggelkow & Christian Tenfelde

Customer Journey – Step 1

Worksheet 1. **Map the current customer journey of one customer experience**

Customer Journey

Why does the customer engage in the interaction?

Latent need

Awareness of need

How does the customer go about identifying, ordering and paying for the desired option?

Search for options

Decide on options

Order & pay

Receive

What products and services are provided to the customer?

Experience good / service

Post-purchase experience

Customer Journey – Step 1

Worksheet 1. Map the current customer journey of one customer experience

C u s t o m e r J o u r n e y

Why does the customer engage in the interaction?		How does the customer go about identifying, ordering and paying for the desired option?		What products and services are provided to the customer?			
Latent need	Awareness of need	Search for options	Decide on options	Order & pay	Receive	Experience good / service	Post-purchase experience

How does the customer decide on what option to choose?
Who is involved?
What advice does the customer seek?

Connected Strategy Capstone

Step 2: Identify WTP Drivers and Customer Pain Points

Professor Nicolaj Siggelkow, PhD

Customer Journey – Step 2

Worksheet 2. **Identify willingness-to-pay drivers and customer pain points at each stage of the journey**

Pain Points							
Latent need	Awareness of need	Search for options	Decide on options	Order & pay	Receive	Experience good / service	Post-purchase experience

© 2019 Nicolaj Siggelkow & Christian Terwiesch

Customer Journey – Step 2

Worksheet 2. **Identify willingness-to-pay drivers and customer pain points at each stage of the journey**

Pain Points							
Latent need	Awareness of need	Search for options	Decide on options	Order & pay	Receive	Experience good / service	Post-purchase experience

- How often is the customer entirely unaware of the need?
- How often is the customer in principle aware of the need but fails to act on it at the current time and locations?

© 2019 Nicolaj Siggelkow & Christian Teneiesch

Customer Journey – Step 2

Worksheet 2. **Identify willingness-to-pay drivers and customer pain points at each stage of the journey**

Pain Points							
Latent need	Awareness of need	Search for options	Decide on options	Order & pay	Receive	Experience good / service	Post-purchase experience

- How do customers identify the options that could fulfill their needs?
- How much time do they spend on the search?

© 2019 Nicolaj Siggelkow & Christian Teneiesch

Customer Journey – Step 2

Worksheet 2. **Identify willingness-to-pay drivers and customer pain points at each stage of the journey**

Pain Points							
Latent need	Awareness of need	Search for options	Decide on options	Order & pay	Receive	Experience good / service	Post-purchase experience

- Are customers generally aware of the most relevant options for them, or is the set of options simply too large?
- Are new options being surfaced for the customer that the customer hadn't been aware of, or is the customer mainly contemplating previously used solutions?

© 2019 Nicolaj Siggelkow & Christian Teneiesch

Customer Journey – Step 2

Worksheet 2. **Identify willingness-to-pay drivers and customer pain points at each stage of the journey**

Pain Points

Latent need	Awareness of need	Search for options	Decide on options	Order & pay	Receive	Experience good / service	Post-purchase experience

- What factors does the customer take into account in making a decision (beyond price)?
- How easy is it for the customer to assess each option for each of these factors?

© 2019 Nicolaj Siggekow & Christian Teneiesch

Customer Journey – Step 2

Worksheet 2. **Identify willingness-to-pay drivers and customer pain points at each stage of the journey**

Pain Points

Latent need	Awareness of need	Search for options	Decide on options	Order & pay	Receive	Experience good / service	Post-purchase experience

- Does the customer use any outside help when deciding on an option (e.g., review sites, reputation scoring)?
- What role does trust in the provider play in the customer's decision-making?

© 2019 Nicolaj Siggelkow & Christian Teneiesch

Customer Journey – Step 2

Worksheet 2. **Identify willingness-to-pay drivers and customer pain points at each stage of the journey**

Pain Points							
Latent need	Awareness of need	Search for options	Decide on options	Order & pay	Receive	Experience good / service	Post-purchase experience

- How much effort does it take the customer to figure out which option would fulfill the needs in the best way?
- How easy is it for the customer to understand how costly each option is (e.g., over the expected lifetime use)?

© 2019 Nicolaj Siggelkow & Christian Teneiesch

Customer Journey – Step 2

Worksheet 2. **Identify willingness-to-pay drivers and customer pain points at each stage of the journey**

Pain Points

Latent need	Awareness of need	Search for options	Decide on options	Order & pay	Receive	Experience good / service	Post-purchase experience

- Once the customer knows what she is looking for, how long does it take for her to order the product/service?
- How easy and convenient is it for the customer to specify where and when the product is to be delivered or the service is to be performed?

© 2019 Nicolaj Siggelkow & Christian Teneiesch

Customer Journey – Step 2

Worksheet 2. **Identify willingness-to-pay drivers and customer pain points at each stage of the journey**

Pain Points							
Latent need	Awareness of need	Search for options	Decide on options	Order & pay	Receive	Experience good / service	Post-purchase experience

- How easy is it to pay?
- What forms of payment are accepted?

© 2019 Nicolaj Siggelkow & Christian Teneiesch

Customer Journey – Step 2

Worksheet 2. **Identify willingness-to-pay drivers and customer pain points at each stage of the journey**

Pain Points							
Latent need	Awareness of need	Search for options	Decide on options	Order & pay	Receive	Experience good / service	Post-purchase experience

- Where will the customer receive the product?
- Does the customer need to pick it up, or will it be sent to the customer's desired location?

© 2019 Nicolaj Siggelkow & Christian Teneiesch

Customer Journey – Step 2

Worksheet 2. **Identify willingness-to-pay drivers and customer pain points at each stage of the journey**

Pain Points

Latent need	Awareness of need	Search for options	Decide on options	Order & pay	Receive	Experience good / service	Post-purchase experience

- How long does it take to receive the product after the customer has ordered it, or how long does the customer have to wait to receive the service she has ordered?
- What happens if the customer is not home when the product will be delivered?

© 2019 Nicolaj Siggekow & Christian Teneiesch

Customer Journey – Step 2

Worksheet 2. **Identify willingness-to-pay drivers and customer pain points at each stage of the journey**

Pain Points							
Latent need	Awareness of need	Search for options	Decide on options	Order & pay	Receive	Experience good / service	Post-purchase experience

- How much effort is required from the customer between receiving the product and deriving a benefit from the product?
- What are the technical features of the product or service that drive the customer's willingness-to-pay?

© 2019 Nicolaj Siggelkow & Christian Teneiesch

Customer Journey – Step 2

Worksheet 2. **Identify willingness-to-pay drivers and customer pain points at each stage of the journey**

Pain Points							
Latent need	Awareness of need	Search for options	Decide on options	Order & pay	Receive	Experience good / service	Post-purchase experience

- Does the customer always get the product at the desired portion size?
- Does the product gain the customer access to complementary products and services?

© 2019 Nicolaj Siggelkow & Christian Teneiesch

Customer Journey – Step 2

Worksheet 2. **Identify willingness-to-pay drivers and customer pain points at each stage of the journey**

Pain Points							
Latent need	Awareness of need	Search for options	Decide on options	Order & pay	Receive	Experience good / service	Post-purchase experience

- What are the intangible product features such as brand, image, and design that drive customer's willingness-to-pay?
- How good is the fit usually between the product/service and the customer's needs?

© 2019 Nicolaj Siggekow & Christian Teneiesch

Customer Journey – Step 2

Worksheet 2. **Identify willingness-to-pay drivers and customer pain points at each stage of the journey**

Pain Points							
Latent need	Awareness of need	Search for options	Decide on options	Order & pay	Receive	Experience good / service	Post-purchase experience

- How easy is it to reach customer support?
- Does the firm reduce the risk that the customer has to bear?

© 2019 Nicolaj Siggelkow & Christian Teneiesch

Customer Journey – Step 2

Worksheet 2. **Identify willingness-to-pay drivers and customer pain points at each stage of the journey**

Pain Points							
Latent need	Awareness of need	Search for options	Decide on options	Order & pay	Receive	Experience good / service	Post-purchase experience

- How easy is it to return the product?
- What is the degree of post-purchase flexibility?
- How easy is it to upgrade or downgrade the product?

Connected Strategy Capstone

Step 5: Understanding the Relationship with Your Customer
Across Repeated Experiences

Professor Nicolaj Siggelkow, PhD

Customer Journey – Step 5

- Repeat Level 1
 - How do we keep track of our customers across experiences?
 - Is this identification requiring time and effort from the customer?
 - Is this identification costly to your firm?
 - What organizational incentives are in place (or what disincentives need to be removed) so that various parts of your organization share the information they have about a particular customer?

Customer Journey – Step 5

- Repeat Level 2
 - How do we improve customization for a particular customer based on information that we have gathered about this customer?
 - What feedback do we gather from the customer to understand whether a particular solution worked well?
 - Can the customer make direct suggestions to us of how to improve our product or service?

Customer Journey – Step 5

- Repeat Level 3
 - How do we currently use population (or market-segment) level data to improve our product assortment, the kinds of services that are available?
 - How do we currently use population (or market-segment) level data to refine features of existing products and services?
 - How do we currently use population (or market-segment) level data to create entirely new products or services?

Customer Journey – Step 5

- Repeat Level 4
 - At what level in the Why-How ladder are most of our transactions currently taking place?
 - What are we currently doing to move up this ladder to provide broader value propositions to the customer?
 - How do we learn from our customers?

ONLINE

Connected Strategy Capstone

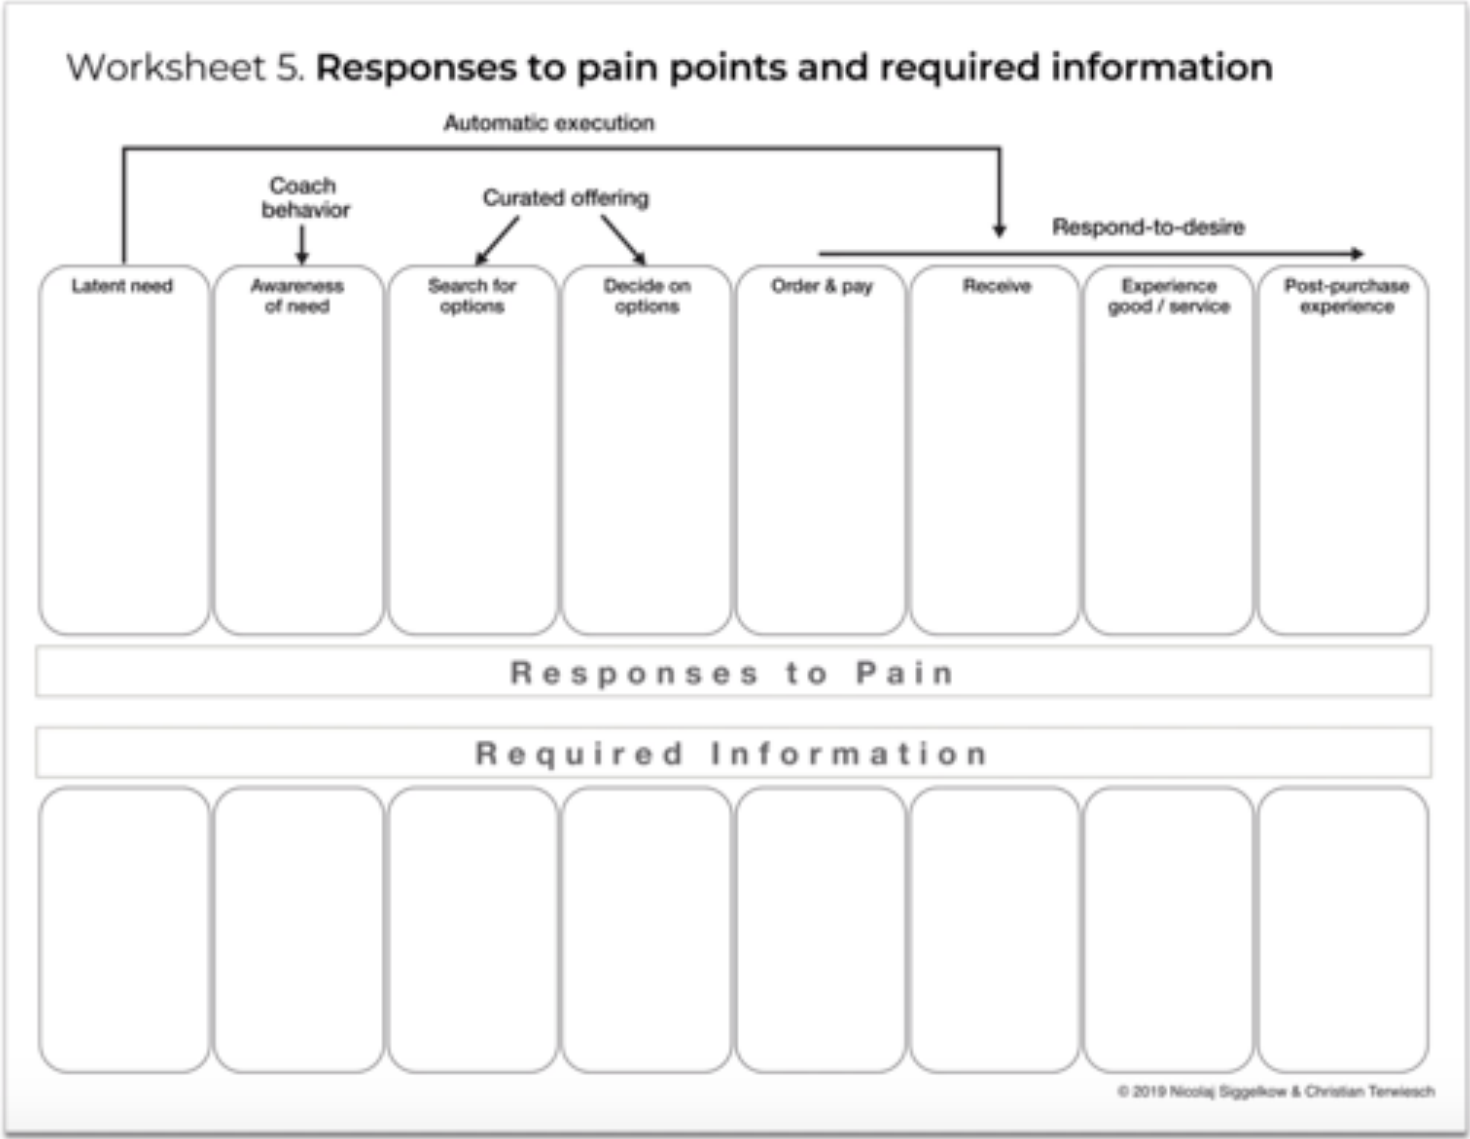

Step 6: Identify New Opportunities to Reduce Customer Pain Points

Professor Nicolaj Siggelkow, PhD

Customer Journey – Step 6

- Reducing pain points
 - What could we do to relieve this pain point or to better address this willingness-to-pay driver?
 - What information would we need that would allow us to implement our solution?
 - What pain point could we relieve with this information? Which willingness-to-pay drivers would we be able to address with this information?
 - For what data would we be willing to pay a lot (and exactly how much?), because it would help us to increase our customer's willingness-to-pay or improve our efficiency?

Customer Journey – Step 6

Customer Journey – Step 6

Worksheet 3. Capture the information flow for this customer experience

ONLINE

Connected Strategy Capstone

Step 7: Utilize Information Gathered from Repeated Interactions

Professor Nicolaj Siggelkow, PhD

Customer Journey – Step 7

- Utilize information
 - How can we improve our ability to keep track of an individual customer and to aggregate information across any touch point we have with this customer?
 - How can we improve the internal incentives, or what changes to the organizational structure do we have to make in order for information sharing to happen?

Customer Journey – Step 7

- Utilize information
 - What have we learned about a customer and the associated needs that would allow us to play a more active role in offering solutions to these needs? How could we use this information to better customize the product or service in the future?
 - What have we learned from serving similar customers that would allow us to change the kinds of products and services that we will include in our line-up in the future?

Customer Journey – Step 7

- Utilize information
 - What have we learned about our customers that might give us insights that even our suppliers do not have about what future features or services are valuable to our customers?
 - What efficiency improvements can be found based on learning from the customer experiences of one customer and from the experiences of the population as a whole?
 - Resulting from these adjustments, what deeper needs of our customers are we able to address?

Customer Journey – Step 7

Worksheet 6. Learning from repeated customer experiences

Experience 1 → Experience 2 → Experience 3 → Experience 4

Customization improvements

Optimization of product and service offering

Creation of new products and services

Efficiency improvements

Fulfillment of deeper customer needs

Connected Strategy Capstone

Step 8: Assess Your Data-Protection Policies

Professor Nicolaj Siggelkow, PhD

Customer Journey – Step 8

- Data Policy
 - What procedures do we have in place to stay informed about data protection and privacy regulations in all the geographies in which we are active?
 - How do we keep up with how public opinion is changing with respect to these issues?
 - How do we currently obtain customer consent? How transparent is it to our customers what happens to their data?
 - What do we do to keep the data current and accurate?
 - What are our activities to keep the data safe and under what conditions do we notify customers of any breaches?

Building Connected Delivery Models: Overview

Professor Nicolaj Siggelkow, PhD

Building Connected Delivery Models

- Connection architecture
- Revenue model
- Technology infrastructure

**Connected
Delivery Model**

Building Connected Delivery Models

- 6 Steps

1. Use the Connected Strategy Matrix to map your own activities and the activities of your competitors
2. Use the Connected Strategy Matrix to create new ideas for Connected Strategies
3. Analyze your existing revenue model and consider alternative revenue models
4. Deconstruct your Connected Strategy into technological sub-functions
5. Find currently used technological solutions for each sub-function
6. Identify new technological solutions

ONLINE

Step 2: Use the Connected Strategy Matrix to Create New Ideas

- What would it mean if we tried to have activities in this cell? How would this business model look like?
- What kind of service or product would we offer to our customer?
- Which of the necessary activities would we engage in ourselves, and which would we provide through other players in the industry?
- What kind of connections to other players would we have to create to pull this off?

Step 2: Use the Connected Strategy Matrix to Create New Ideas

- What are the most expensive resources in creating our product or service now?
- Where do we waste costs or capacity now, and how might this be reduced if we connected entity A with entity B?
- How could a connection architecture be used to share or reduce the risks associated with fluctuating demand or other forms of volatility?

Step 2: Use the Connected Strategy Matrix to Create New Ideas

- What information flow will have to happen between these players?
- What incentives are you going to provide to the various players to be connected by you?

ONLINE

Connected Strategy Capstone

Step 3: Analyze Your Existing Revenue Model and Consider Alternatives

Professor Nicolaj Siggelkow, PhD

Step 3: Analyze Your Existing Revenue Model and Consider Alternatives

- What does the customer pay for?
- What are your different revenue streams?
- Who is paying?
- When does payment occur?

Step 3: Analyze Your Existing Revenue Model and Consider Alternatives

- You can Change WHAT is paid for
 - Product vs service
 - Pay-for-Performance

Step 3: Analyze Your Existing Revenue Model and Consider Alternatives

- Change WHEN the payment is made
 - Pay-as-you-go/use or as value is created (e.g., freemium)
 - Requires change of how payment is organized

Step 3: Analyze Your Existing Revenue Model and Consider Alternatives

- Change WHO is paying
 - Think ecosystem, not supply chain

Step 3: Analyze Your Existing Revenue Model and Consider Alternatives

- Change WHY customers pay
 - Move up the why-how ladder

Step 3: Analyze Your Existing Revenue Model and Consider Alternatives

- Change the currency
 - Data vs. money

Step 3: Analyze Your Existing Revenue Model and Consider Alternatives

- What new revenue model would you implement if you were able to create new connected customer experiences (e.g., coach behavior or automated execution)?
- What new revenue models would be possible or required if you decided to move to new rows in the connected strategy matrix given your existing connection architecture?

Step 6: Identify New Technological Solutions and How Those Might Enable Innovations

- Technology push
 - Rather than thinking about the needs of the customer, start with a given technology
 - “How might we take advantage of technology X?”
 - For example: “How can our business benefit from advances in natural language processing or in augmented reality?”
